Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 23 February 2005.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Applicants amendment of claim 8, in the paper of 2/23/2005, is acknowledged. Claims 8-13, 56 and 70-75 remain at issue and are present for examination. Applicants' arguments filed on 2/23/2005, have been fully considered and are deemed to be persuasive to overcome some of the rejections previously applied. Rejections and/or objections not reiterated from previous office actions are hereby withdrawn.

Claim Objections

Claims 13, 74 and 75 are objected to because of the following informalities: Claims 13, 74 and 75 are dependent on rejected claim 8. Appropriate correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

The rejection of claims 8-13 and 71-73 are under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement is hereby withdrawn based on applicants deletion of "thereby degrading single-stranded RNA in said preparation" from claim 8.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 8-12, 56, 70, 71 and 73 under 35 U.S.C. 103(a) remain rejected as being unpatentable over Major (Biotechniques, Vol 12, No. 1, 1992, pages 40-43) and Maudru et al. (Journal of Virological Methods 66: 247-261, July 1997).

The rejection was stated in the previous office actions. In response to this rejection applicants have amended claim 8 and traverse the rejection as it applies to the newly amended claims.

Applicants disagreement of the rejection for the reasons previously made of record is recognized. Applicants continue to traverse this rejection by noting the previous statement by the Examiner stating "Applicants characterization of Maudru as being concerned with assaying the presence of reverse transcriptase in a sample is misleading." (See previous office action page 7). Applicants reiterate their position that the assay system of Maudru is in fact concerned with assaying the presence of reverse transcriptase in a sample in order to detect retroviruses and present a number of potential's of the RT assays.

Applicants arguments are acknowledged, however found nonpersuasive for the reasons previously made of record. In response to applicants above argument,

applicant's statement and thus characterization that according to Maudru et al., the RT assays mentioned therein have the potential to: 1) identify novel **retroviruses**, 2) reveal the presence of **retroviruses** and 3) detect low levels of contaminating **retroviruses** appears to be support the previous statement by the Examiner stating "Applicant's characterization of Maudru as being concerned with assaying the presence of reverse transcriptase in a sample is misleading." (See previous office action page 7). Thus applicant's above argument is found confusing and not found persuasive. Further applicants are reminded that the above statement which applicants have focused on in the instant response is but a minor part of the arguments presented in the previous office action.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
